Advanced Forms Installation

This document provides instructions to install Advanced Forms. For help installing, contact support@omnibyte.com. Verify you are using Windows version 10 or greater before installing.

After installing Advanced Forms, complete the following:

- In your Location Settings, be sure the Advanced Forms app is turned on to use the GPS coordinates.
- In Device Settings, you must have a webcam enabled to use the Advanced Forms images and barcode features.

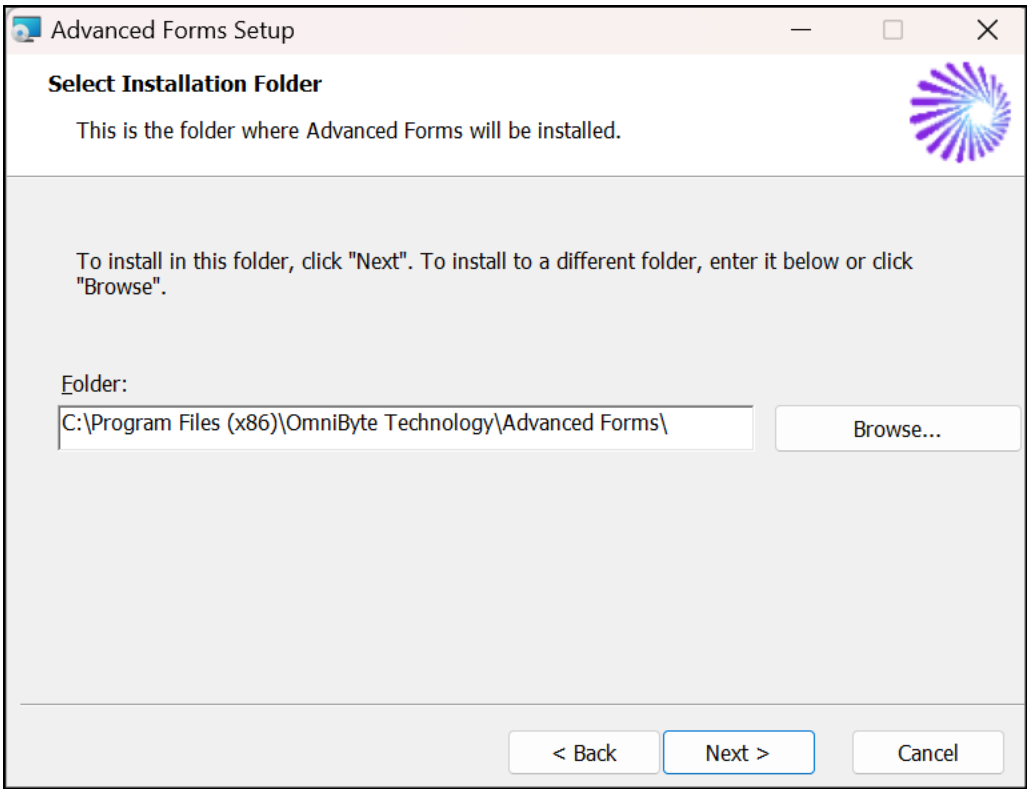

Advanced Forms Installation

To install Advanced Forms:

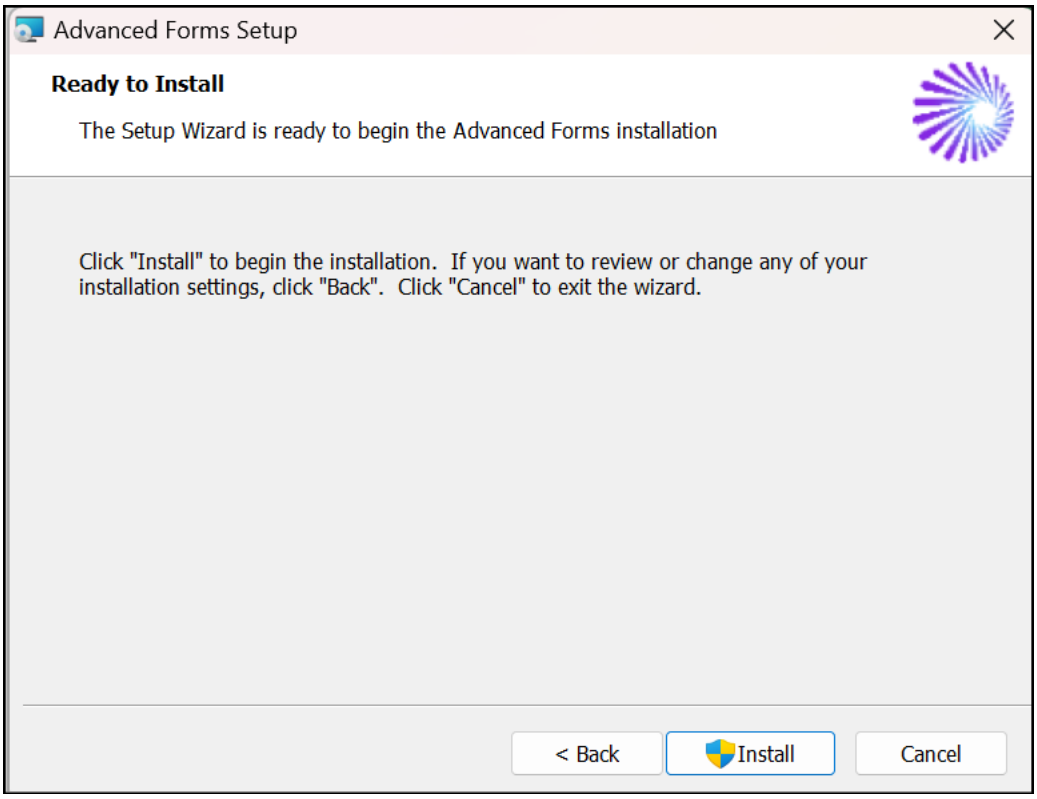

1. Copy the MSI install package to a folder or to the desktop on your machine.
2. Double-click the **Advanced Forms** install file. The Welcome to the Advanced Forms Setup Wizard window opens.

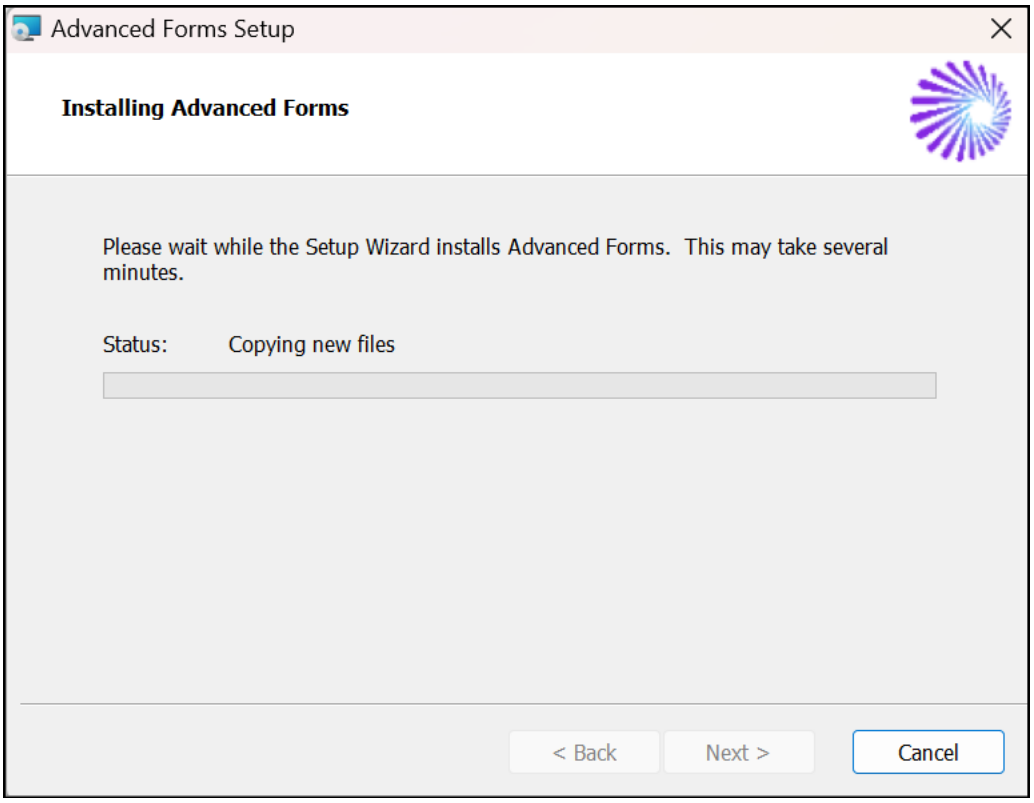

3. In the Welcome to the Advanced Forms Setup Wizard, click **Next**. The Select Installation Folder window opens.

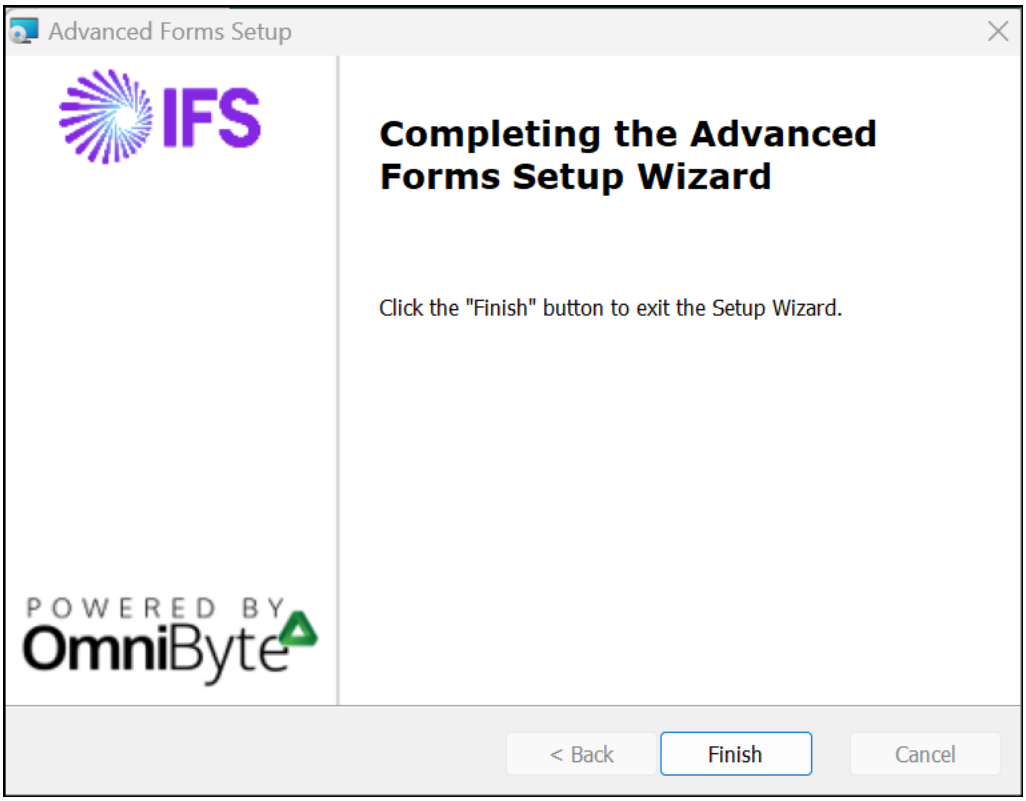

4. Specify where you want to install Advanced Forms, then click **Next**.
5. The Ready to Install window opens.

6. Click **Install**. A message appears instructing you that changes are being made to the computer. Click **Yes**. The Installing Advanced Forms window opens.

7. When Advanced Forms is done installing the Completing the Advanced Forms Setup Wizard window opens.

8. Click **Finish**.

   We recommend adding the Advanced Forms app to the Start menu or pin it to the Taskbar for easy access.
